# Install the following NuGet Packages

- In the **Visual Studio Solution Explorer,** right-click on **Dependencies** after Connected Services and click on **Manage NuGet Packages.** You are required to install the following packages needed for the four storage services untilized within the Web Application.
- Install **Azure.Data.Tables** version **12.11.0** by Microsoft. Click on it and then click on **install,** then click on **apply** and then **I accept.**
- Install **Azure.Storage.Blobs** version **12.25.0** by Microsoft. Click on it and then click on **install,** then click on **apply** and then **I accept.**
- Install **Azure.Storage.Files.Shares** version **12.23.0** by Microsoft. Click on it and then click on **install,** then click on **apply** and then **I accept.**
- Install **Azure.Storage.Queues** version **12.23.0** by Microsoft. Click on it and then click on **install,** then click on **apply** and then **I accept.**
- You can click on **Installed** page after **Browse,** to see the dependencies that you have installed.
- Close all the opened UI
- Under **Dependencies,** navigate to **Packages,** the four packages you installed should now appear as shown in the snapshot as follows:

- Check that you have **Microsoft.VisualStudio.Web.CodeGeneration.Design (9.0.0)** If you do not have this, install this package.
